Recommendations

08

- a) Marketing Campaigns During Slow Time Slots
 - I.e. Run targeted promotions (discounts, loyalty points, digital ads) during low-demand hours.
 - b) Stock More of the Best-Selling Items
 - Prevent lost sales due to stock-outs.
 - Adjust inventory planning to align with demand.
 - c) Promote Underperforming Products
 - Bundle with best-sellers, offer limited-time discounts, or reposition in store/online.
- 

Next Steps

- Align with Marketing on campaign design.
- Share insights with Supply Chain for inventory adjustments.
- Set up dashboards for real-time monitoring.

Conclusion

The analysis highlights strong opportunities to increase revenue by optimizing marketing timing, stocking strategy, and product promotion. Implementing these changes can improve both sales and customer satisfaction.
